**Re: Purchase of land adjoining the Myaree substation**

Western Power has recently acquired the properties at 3 Shields Crescent and 178 Kitchener Road Booragoon for the expansion of the exiting Myaree substation.

The properties have been purchased for the proposed expansion of the Myaree substation site to meet the increased demand for electricity in the South Fremantle electricity supply area and to increase the reliability of the electricity supply to the area.

Western Power intends to commence the substation expansion works in late 2011 with construction scheduled for completion in 2013.

Western Power will keep you up to date with information as soon as a decision as to the development of the site has been made.

For more information about the project please contact Ben Schneider on 9326 6378 or email [ben.schneider@westernpower.com.au](mailto:ben.schneider@westernpower.com.au).

Yours sincerely
